

## Windows Aero user interface effects introduction

Windows Aero is used from the Windows Vista's new user interface, let user run through the eyes of a transparent glass. "Aero" means: *Authentic, Energetic, Reflective and Open*.

Here to give you a brief introduction of the four ways to use special effects.

- ◆ **Aero Peek: Win+ 【Space】**  
Function: quickly view your desktop。
- ◆ **Aero Snap: Win+ 【↑↓←→】**  
Function: Reset window position and the window size
- ◆ **Aero Shake: Win+ 【Home】**  
Function: quickly minimize your opsen Windows other than the active window, or you can shake your currently opened window to do this function.
- ◆ **WIN7 Stereo desktop: Win+ 【Tab】**  
Function: switch all currently open Windows, stereo, cool.

See you next week.
