

Freeze header content scrolling

When Excel content scroll too long, it is possible to forget what each column's title. If you scroll the mouse, first line of the header does not move, scrolling the contents starting from the second row, browsing a lot easier. Using *freeze panes* function can solve the problem. This time, we'll give you a detailed introduction on how to use *freeze panes* function.

Steps:

1. **Freeze Top Row**, click *View* → *Freeze Panes* → *Freeze Top Row*, Keep the top row visible while scrolling through the rest of the worksheet.
